Accuracy of the Maps

1. Please note here: Incorrect polygons (ie, remnants with incorrect attributes e.g. classifications, size, condition etc.) with the following details: map #, vertical and horizontal map reference number (AMG grid ref. E.g. 350800, 6327790.), community classification. (If possible please send a photocopy of the relevant section with the grid references marked if changes).

2. Please note here absent polygons ie. Remnants of native vegetation greater than 0.5ha not mapped. As above please provide as much details as possible on the locations of the remnant and a map if possible.

3. Have you any comments on the community classifications and profiles? If the classified communities do not fit the profiles explain why, making reference to species composition where possible. In addition if you have any particular examples on the maps please refer to them as specifically as possible.

Using the Maps

4. Have you any comments (positive/negative) on the information and presentation provided on and with the maps? (eg layout, colour/ shading)
